Paper 'Domain Exploration of Seasonal Weather Information for Farmers in Uganda'

- Concretize paper by adding aspects on data-based conceptual modeling (models)
- Reconfigured USSD app to API of new service provider
- SE students incorporated live map aspect - for location specific advisory
- Plan for deployment of packaged WIDS (web, USSD, live map)
Next Steps (carried forward)

- Continue structuring thesis
- Extend 'The Need for an Integrated Effective Weather Dissemination System for Uganda' as journal paper
  - With comments from co-authors
  - Considering Elsevier journals (development)
- Continue work on 'Domain Engineering as a technique for discovering Microservice Functionality'
Thank you!
