Domain Engineering for Weather Information Services

Doreen Tuheirwe-Mukasa

Makerere University

July 2018
Paper ’Domain Exploration of Seasonal Weather Information for Farmers in Uganda’

- Concretize paper by adding aspects on data-based conceptual modeling (models), for a generic model
- Working on related work, literature review
  - Conceptual weather models
- Type setting according to IJSEKE journal
Thesis

- Latex structure on overleaf - read only link at https://www.overleaf.com/read/cxrcqtkmkzhhk
- Sections to be structured from the technical report (https://www.overleaf.com/read/mygvhxvmcmnk)
- Student interns testing and refining the system with feedback
- Training for farmer group
- Ready for deployment
Next Steps

- Continue structuring thesis
- Continue work on 'Domain Engineering as a technique for discovering Microservice Functionality'
  - Builds up on first Microservice paper with the specifics of the domain model
Thank you!
